

autoVHC Installation Guide – IOS Application

1

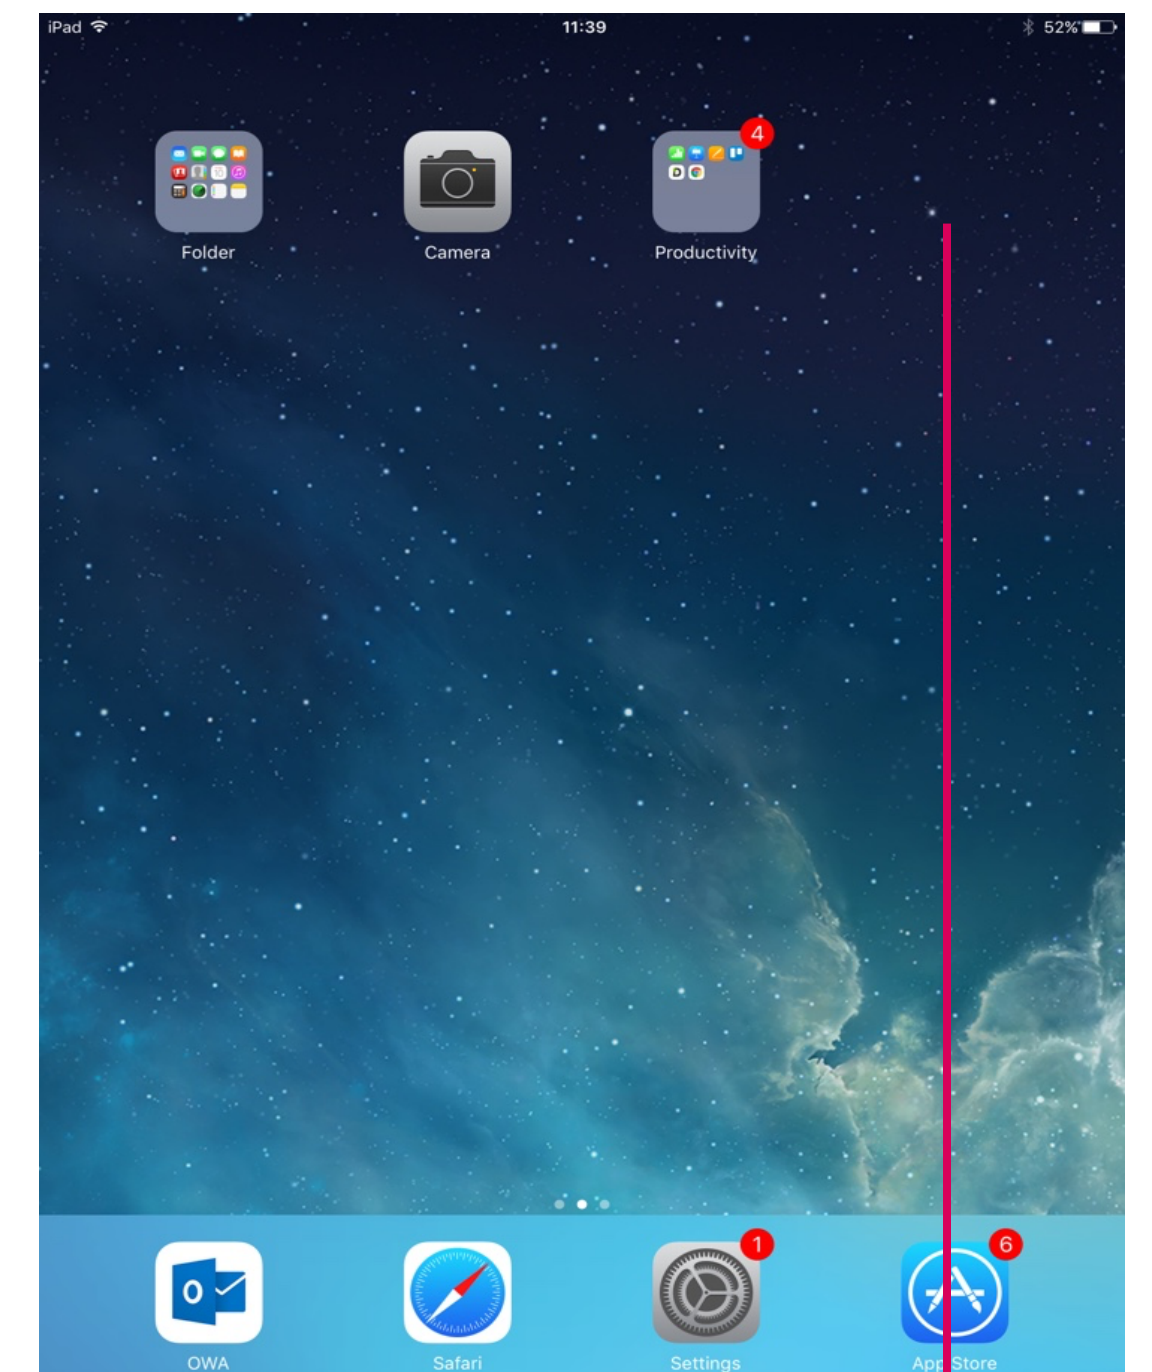

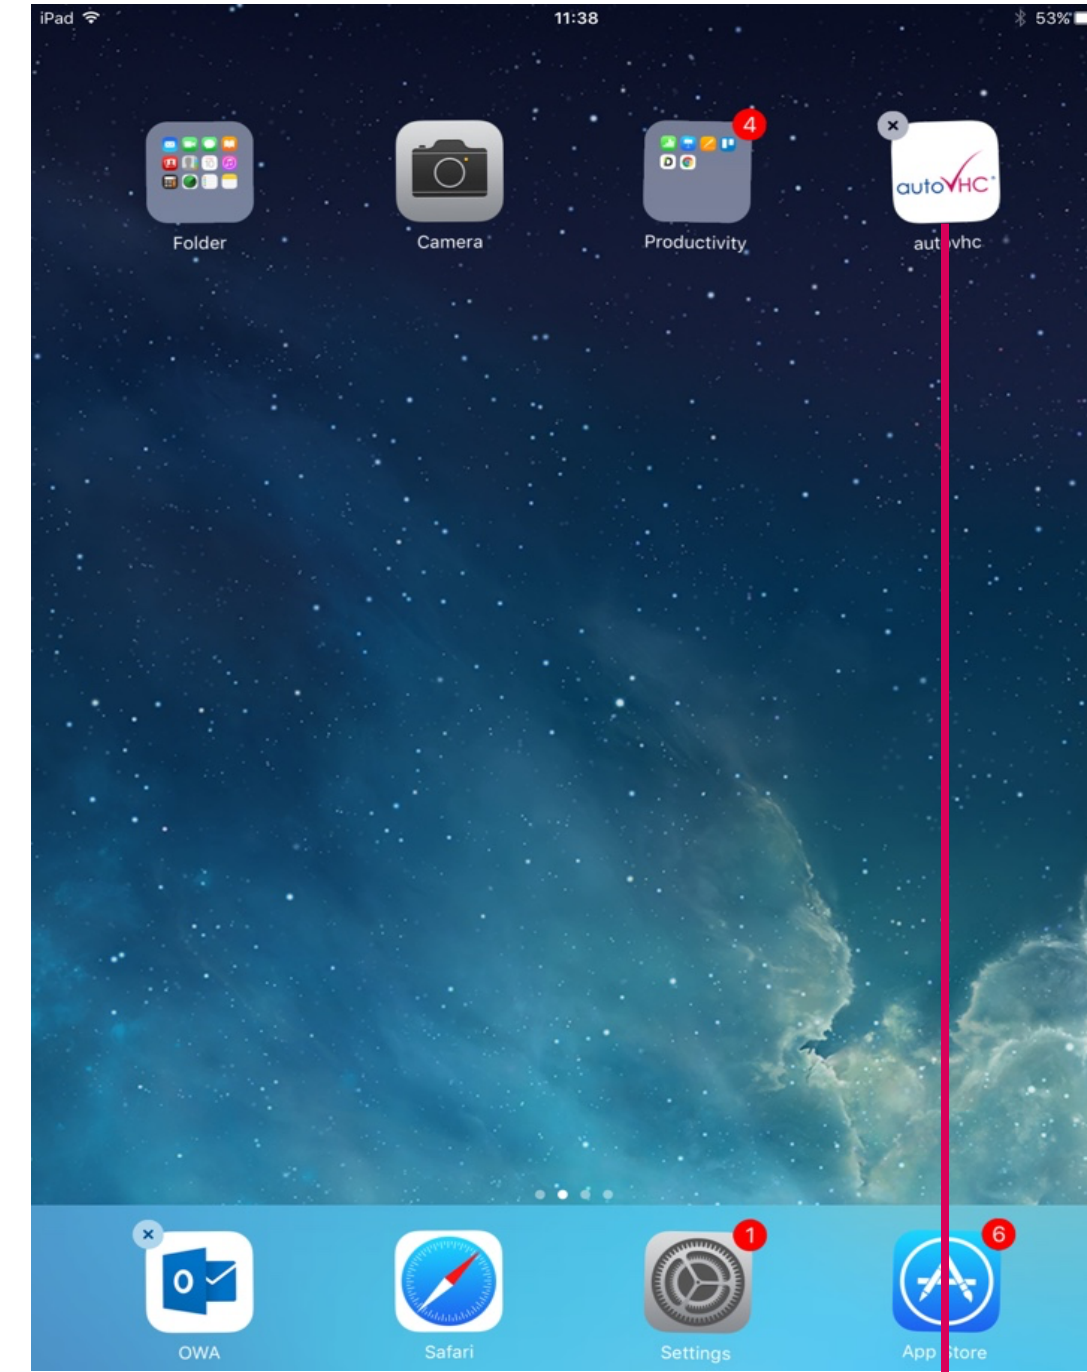

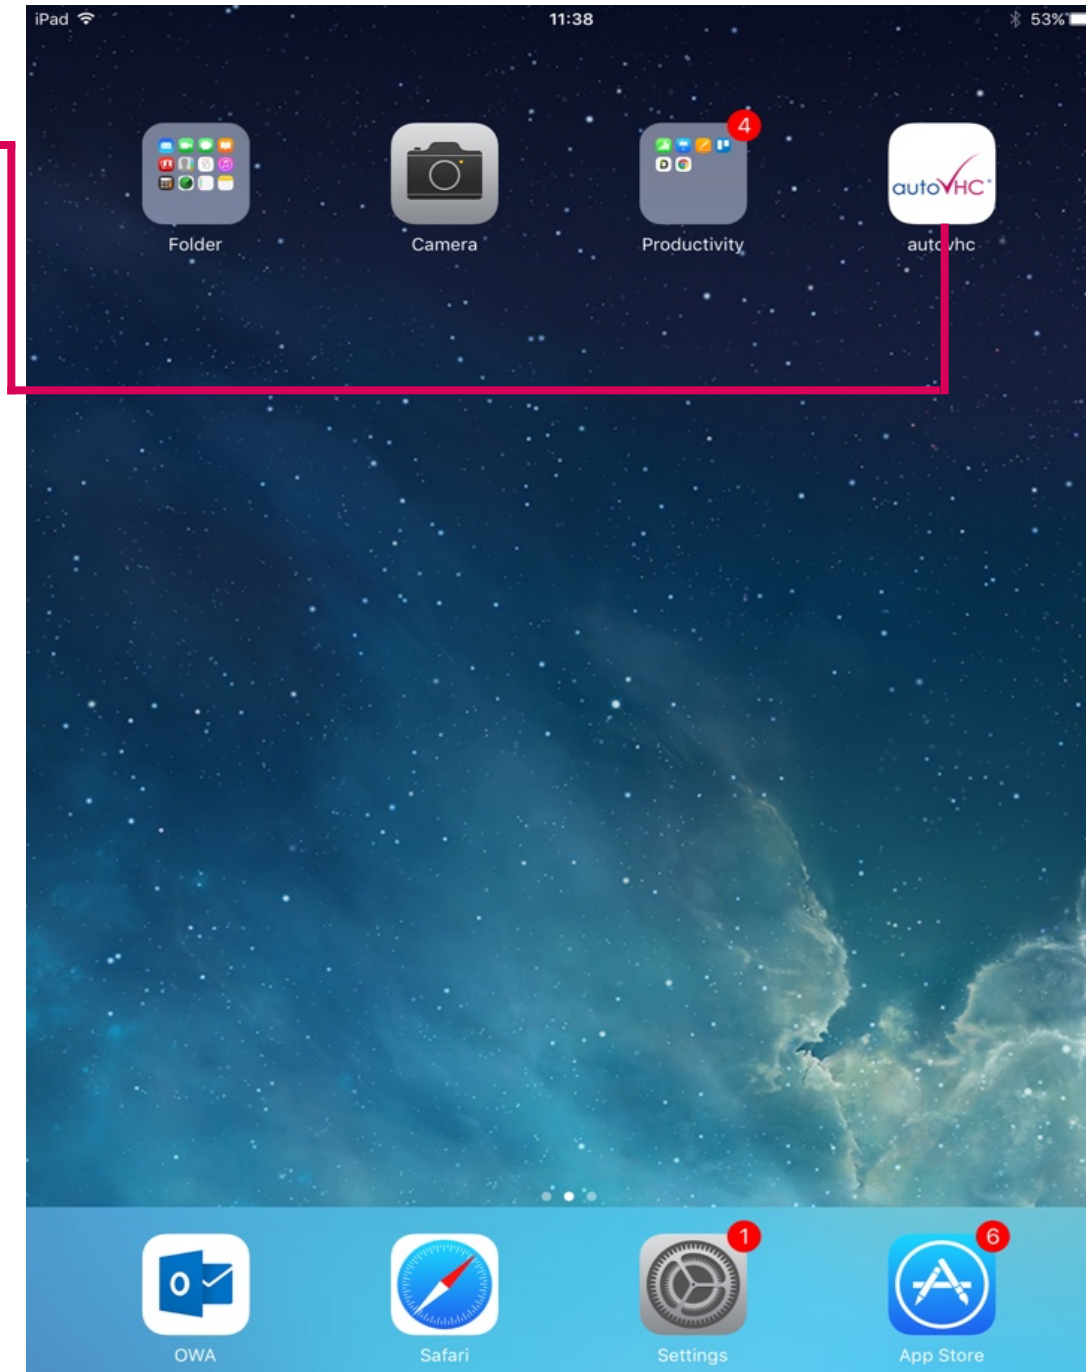

First check to see if you have any old autoVHC apps. If you do, please follow the instructions below and if not skip to step 4.

2

Press and **Hold** the application until it starts to Wobble and a cross appears in the top left corner.

3

Press the **cross** and then confirm by pressing **Delete**.

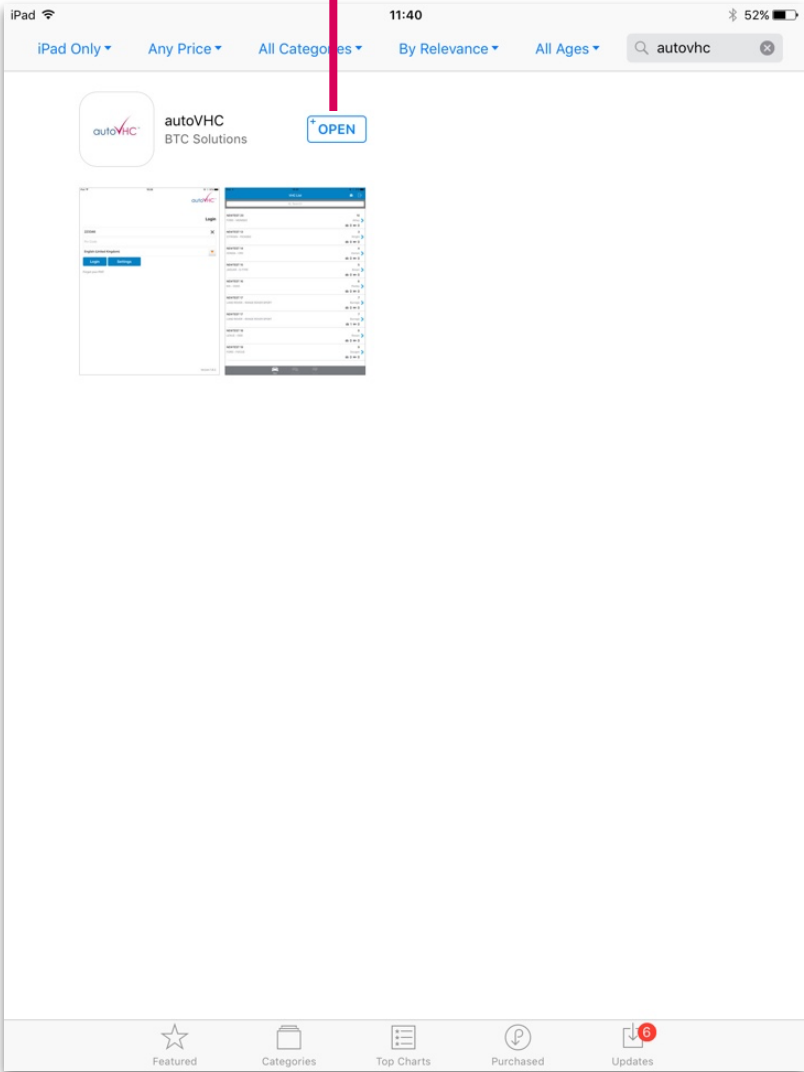

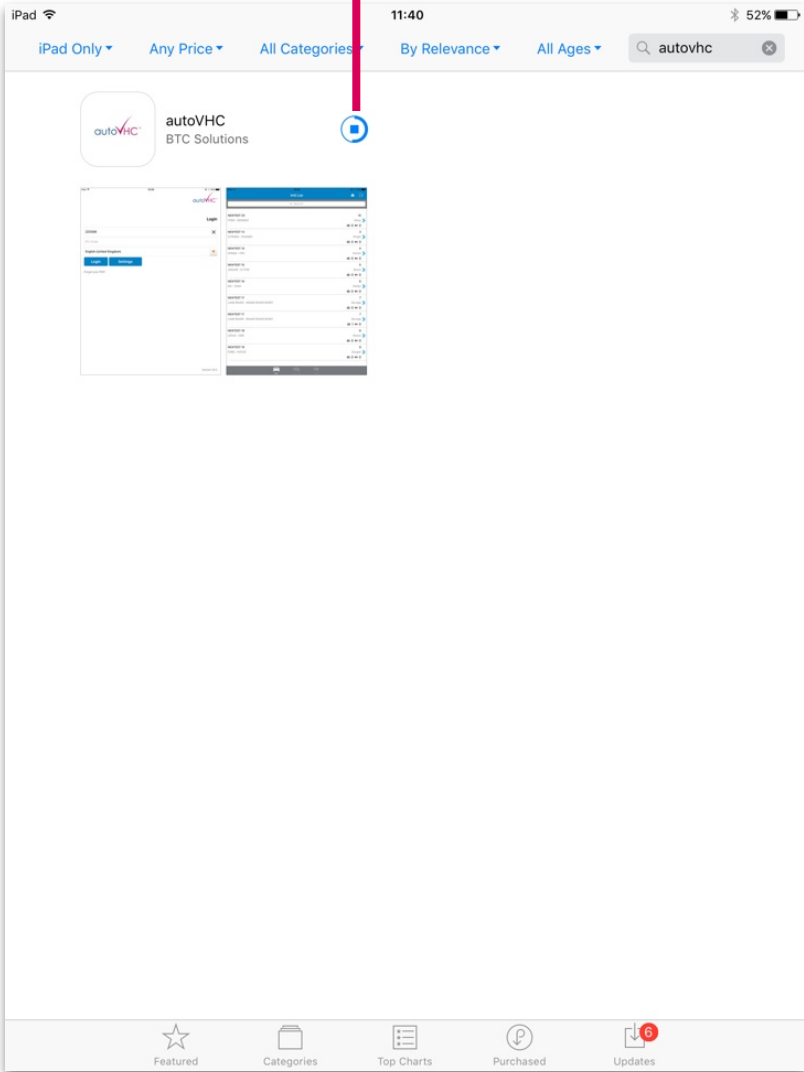

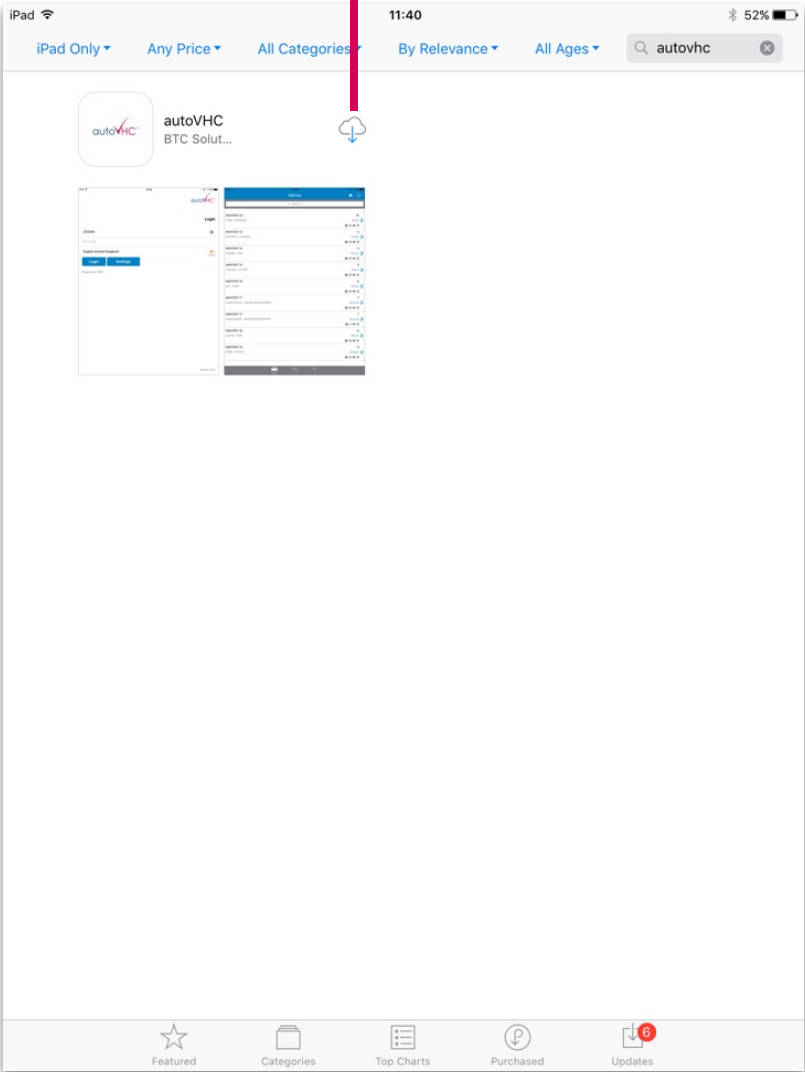

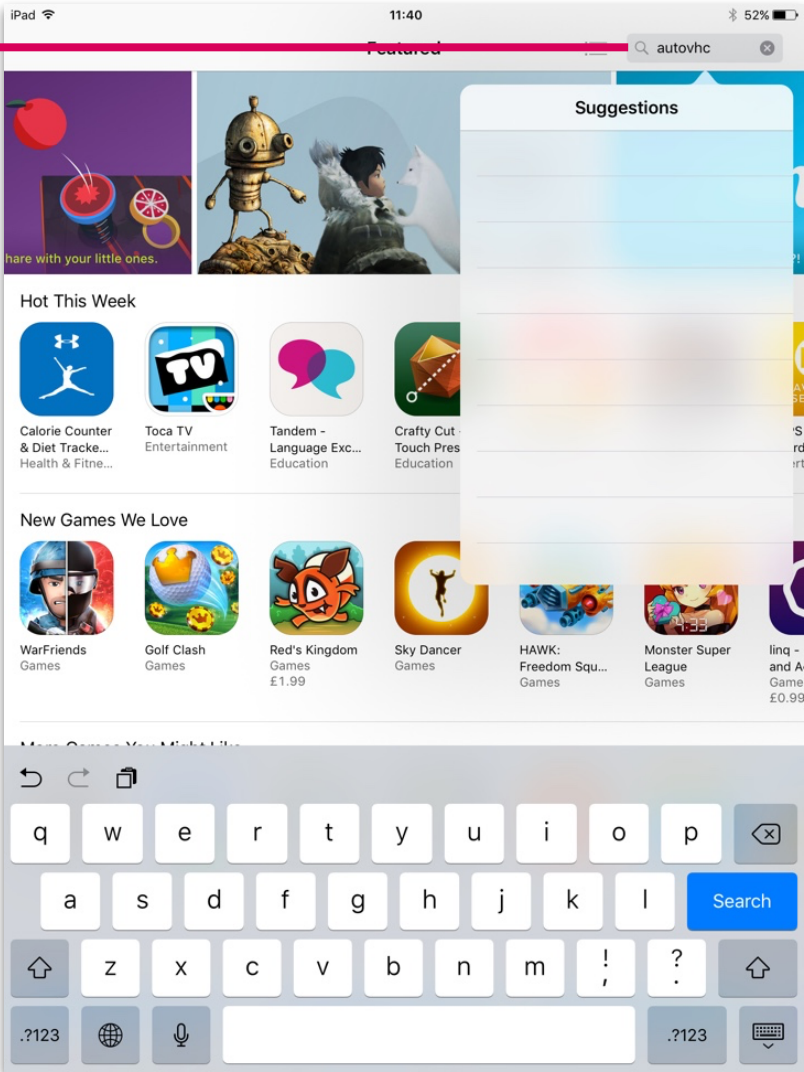

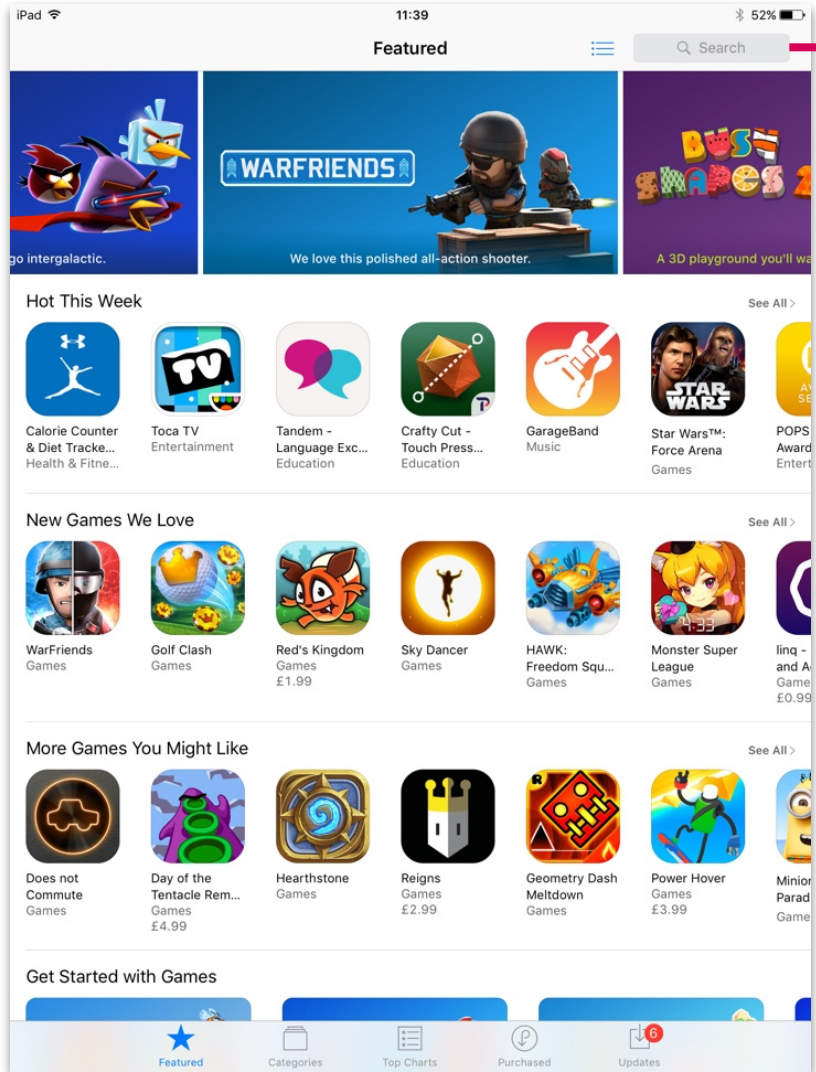

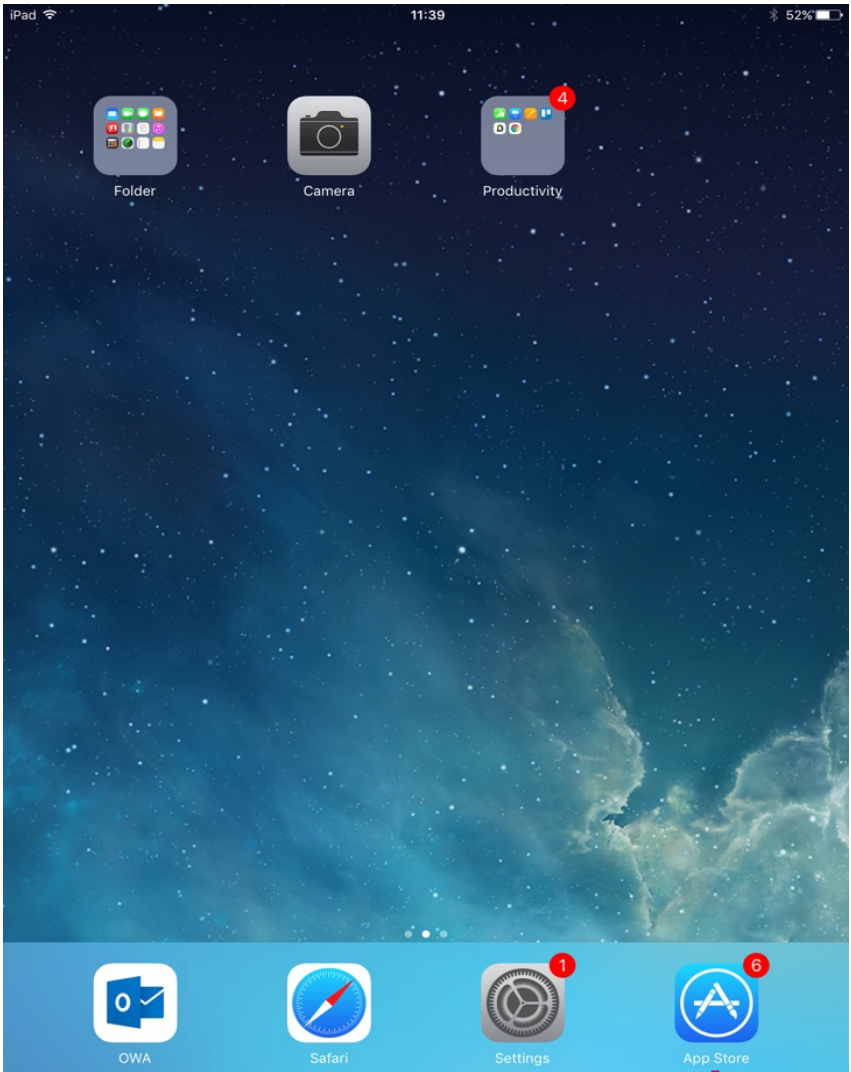

autoVHC Installation Guide – IOS Application

5 On your IOS device, open the **App Store**.

6 When you see the App Store home screen press search in the top right hand corner. You can then type **autovhc** and hit search on the keybaord.

7 Click on the autoVHC App, click **Get**. At the point it may prompt you for an iCloud address. If you already have one please log in. If you do not then please follow the on screen instructions to create one. Once you are signed in the Application will download.

8

Press the Home button on the device so see a list of all applications installed on the device. autoVHC should be in this list and the installation is now complete.

For any issues, please contact autoVHC support. You can log a ticket at <http://helpdesk.b-t-c.co.uk>, using your normal autoVHC login. Alternatively, you can call the autoVHC support helpdesk on **01270 539 894**.
